Jaewoo Kim

Ph.D. Candidate, Department of Aerospace Engineering
Korea Advanced Institute of Science and Technology (KAIST)
291 Daehak-ro, Yuseong, Daejeon 34141, Republic of Korea
Phone: +82-42-350-3770 | Email: jw.kim@kaist.ac.kr | LinkedIn | Website

RESEARCH INTERESTS

Space Systems Design & Operations

- Lifecycle-based space systems design considering stakeholder interactions and operational constraints
- Planning and management of space operations for efficient, resilient, and sustainable space utilization

Engineering Decision-Making Problems

- Formulation of complex engineering problems by identifying key system drivers
- Quantitative decision-making frameworks for interpretable and actionable engineering insights

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) Daejeon, Korea

Ph.D. in Aerospace Engineering *Feb. 2027 (Expected)*

- Thesis (in progress): Maintenance Strategies for Satellite Mega-Constellations (Advisor: Prof. Jaemyung Ahn)

M.S. in Aerospace Engineering *Feb. 2024*

- Thesis: Optimal Satellite System Architecting Considering On-Orbit Refueling (Advisor: Prof. Jaemyung Ahn)

Seoul National University (SNU) Seoul, Korea

B.S. in Aerospace Engineering *Feb. 2022*

- Thesis: Celestial Navigation Using Stars and Planets on Lunar Exploration Orbit (Advisor: Prof. Changdon Kee)

RESEARCH EXPERIENCE

Graduate Research Assistant | *Strategic Aerospace Initiative, KAIST* *Mar. 2022 – Present*

- **In-Space Servicing and Manufacturing Research Center (ISMRC)**
  Duration: 2025–2035; Sponsor: National Research Foundation of Korea
  - Developed a maintenance framework for satellite mega-constellations integrating on-orbit servicing [C6]
  - Surveyed standardization of space logistics framework [C20, C21]
- **Space Logistics Modeling and Demand Fulfillment Strategy Evaluation Framework**
  Duration: 2025–2028; Sponsor: National Research Foundation of Korea
  - Developed frameworks for evaluating the value of on-orbit servicing and potential architectural changes for GEO communication satellites [J5, C5, C23, C26]
  - Proposed maintenance strategies for satellite mega-constellations [J4, P1, C1, C6, C8, C22, C29]
  - Supported conceptual design for a space debris remediation program [C4, C7]
  - Surveyed in-situ resource utilization from a logistics perspective [C20]
- **Multi-Criteria Decision Making for Optimal Modular System Architecture Selection**
  Duration: 2024–2026; Sponsor: Hyundai Motor Company
  - Surveyed multi-criteria decision-making methods and their applications in system architecting
  - Developed a decision-making framework for design structure matrix-based modular architecture design considering OEM-supplier interfaces [P2]
  - Supported the development of a mathematical programming approach for modular architecting with conflict resolution among design constraints [J1]
  - Developed a mathematical programming-based framework for constrained modularity maximization [J10, C13]
- **Development of an Integrated Space Risk Response System**
  Duration: 2024–2027; Sponsor: Korea Astronomy and Space Science Institute
  - Surveyed models for the space object environment and collision-risk analysis
  - Developed engineering and evolutionary models of space collision environment for Korean Integrated Space Risk Response System [J2, K1, C3, C9, C10, C12, C14, C15, C18, C19, C24, C27, C28, C30]
  - Developed a ground-space cooperative sensor tasking framework for operational planning [P4, C16]
- **A Study on the Principle of Modular Architecture Engineering to Improve Level of Completion for Vehicle Architecture**
  Duration: 2022–2023; Sponsor: Hyundai Motor Company
  - Developed a mathematical programming approach for design structure matrix-based modular architecting [J6]
  - Conducted case studies on automobile subsystems and identified improved design solutions
- **Research on ADR/OOS Applications for National Security Space Assets**
  Duration: 2022; Sponsor: Korean Society for Aeronautical and Space Sciences
  - Reviewed on-orbit servicing technologies and related mission concepts [C35]
  - Developed concepts of operations for ADR/OOS missions
- **Development of Launch Vehicle Mission & Conceptual Design Software**
  Duration: 2022–2023; Sponsor: Hanwha Aerospace
  - Developed propulsion and staging modules for multidisciplinary design optimization
  - Contributed to the development of an all-at-once design optimization framework considering flight requirements [J8, C32, C33]

Undergraduate Researcher | *GNSS Laboratory, SNU* *Mar. 2021 – Aug. 2021*

- **Deep Space Navigation with Optical Sensor Data**
  - Reviewed non-inertial deep-space navigation algorithms
  - Evaluated the selected algorithm through numerical simulations

Teaching Experience

Teaching Assistant | *KAIST* *Sep. 2023 – Present*

- Courses: AE210 Aerospace Thermodynamics ('24 S), AE280 Software Application in Aerospace Engineering ('26 S, '25 S), AE401 Aerospace System Design II ('23 F), AE450 Flight Dynamics and Control ('24 F), AE551 Introduction to Optimal Control ('26 F, '25 F)

Part-Time Lecturer | *Humaiin Co.* *Aug. 2022 – Present*

- Delivered lectures and developed instructional materials covering foundational data science concepts, programming tools, and LLM-based workflow automation.
- Institutions: Busan City Government, Korea Education & Research Information Service (KERIS), Statistics Korea (KOSTAT), Ewha Womans University, Sookmyung Women's University, Seoul AI Foundation, Hanwha Solutions, Lotte Chemical

Professional Services

- Reviewer for *Systems Engineering*, *International Journal of Aeronautical and Space Sciences*; *AIAA SciTech Forum*, *AIAA AVIATION Forum*.

Awards & Honors

2025 Korean Space Science Society Spring Conference | *Best Oral Presentation Award* *Apr. 2025*

- Presentation Title: Progress of space debris environment and risk analysis framework development

Optimization Grand Challenge 2024 | *Top 10% of Participants* *Oct. 2024*

- Competition to develop an optimization algorithm for pickup-and-delivery problems, sponsored by LG CNS
- Team Name: J2Opt

Hanwha-KAIST Space Hub Space Grand Challenge | *Bronze* *Nov. 2023*

- Competition for innovative space systems, technologies, and mission concepts, sponsored by Hanwha Aerospace
- Team Name: LETA (Lunar Exploration Trajectory Analytics)
- Topic: Lunar exploration trajectory design with low-thrust propulsion and multiple gravity assist
- Prize: 3,000,000 KRW (2,050 USD)

Extracurricular Experience

Military Service | *Defense Security Command (DSC)* *Apr. 2018 – Nov. 2019*

- Supported educational programs for military officers in DSC, and served as a squad leader
- Received commendation from DSC School Head (Brigadier General)

Interviewer | *Humans of SNU* *Jul. 2017 – Dec. 2017*

- Interviewed diverse members of the SNU community and discovered insightful and interesting stories

Volunteer | *People to People International* *Mar. 2016 – Feb. 2018*

- Supported underprivileged communities in Seoul
- Student chapter union president (2017); SNU chapter president (2016)

OTHER SKILLS

Programming

- Python, MATLAB, Julia, C, C++, Java for quantitative analysis, including optimization, simulation, and statistical reasoning

Languages

- Korean (native), English
